Harmonizing Coastal Industrialization with Marine Ecosystem Health (HCIMEH 2017)

25 SEPTEMBER 2017

**ICAR-CENTRAL MARINE FISHERIES
RESEARCH INSTITUTE,**
HOIGE BAZAR, MANGALURU, KARNATAKA 575001

Background

The ICAR-Central Marine Fisheries Research Institute, the national Institute under the Indian Council of Agricultural Research, Ministry of Agriculture & Farmer's Welfare is celebrating its Platinum Jubilee year during 2017-18. The Institute through its marine fisheries research programmes contributes immensely to the development of the fisheries sector. Besides developing fishery management plans, it undertakes studies on climate change and anthropogenic activities; mariculture and allied R&D; nutraceuticals from marine organisms; marine environmental monitoring, economics of fishing operation; socio-economic status of fisherfolk and HRD. Institute also offers consultancy services to several organizations on marine pollution monitoring, health of the sea with special reference to industrial and thermal effluents, EIA, biodiversity evaluation and baseline studies in coastal environment.

Overall development leading to self-sufficiency is the benchmark of developed and developing countries. Industrialization, exploration and utilization of available natural resources are an integral part of such progressive developmental activities. However, judicious management of available natural resources for the benefit of mankind is the key for sustained development. To achieve this, comprehensive policies for the management of natural resources as well as for the adoption of low-waste or environmentally clean technologies are of paramount importance. The marine fisheries sector over the years has grown into a major industry contributing significantly to the agricultural GDP of the country; providing employment opportunities and meeting food security.

In commemoration of the seventieth year of establishment of ICAR-CMFRI, the Mangalore Research Centre is organizing one-day National workshop on 'Harmonizing Coastal Industrialization with Marine Ecosystem Health' (HCIMEH 2017). The workshop provides a platform for major industries/organizations located along the coast of Karnataka to showcase their activities for promoting sustainable development of the fisheries sector including wellbeing of coastal fishers.

Themes

The workshop will address the roles and responsibilities of the stakeholders in sustaining the coastal ecosystem health in Karnataka with presentation on the following broad areas by invited speakers:

- ✓ Coastal industries and regulatory standards in Karnataka
- ✓ Institutions and their role in coastal environmental monitoring
- ✓ Environment & Safety measures and Corporate Social Responsibilities (CSR)

Participation

The workshop is for invited officials from large industries, medium enterprises, IFAFEA, fish processing houses, regional and national government organizations in the fisheries sector (DOF, Karnataka, CIFT, MPEDA, KFDC, KSPCB, COF, NITK, Dept. of Marine Biology, Karwar, SEZ) involved in effective and inclusive management of marine and coastal ecosystem of Karnataka. Organizations/industries may sponsor two or three participants to attend this workshop.

Venue:
Hotel Motimahal,
Falnir Road, Hampankatta,
Mangaluru

Kindly make own arrangements to reach the venue.
